

Dear Superintendent Watkins and the Santa Cruz County Office of Education Trustees,

Please bring together both parties and help us end this controversy over Pacific Collegiate Facilities space. COE and PCS are the two parties involved--not Santa Cruz City Schools.

As the chartering agency, 100% of the students at PCS are the County Office of Education students. Any Proposition 39 request should come to the County Office and it is your responsibility to provide space for a school that you chartered.

Take responsibility for the PCS students and help them find a facility but not on the backs of other students. Take responsibility for the school you are legally bound to oversee and make sure their diversity efforts reflect a change in PCS to reflect the diversity of the county by which they are chartered.

Support ending the segregation at PCS so that it will be deserving of our public funds.

Thank you,
